# Response rates to FAO questionnaires

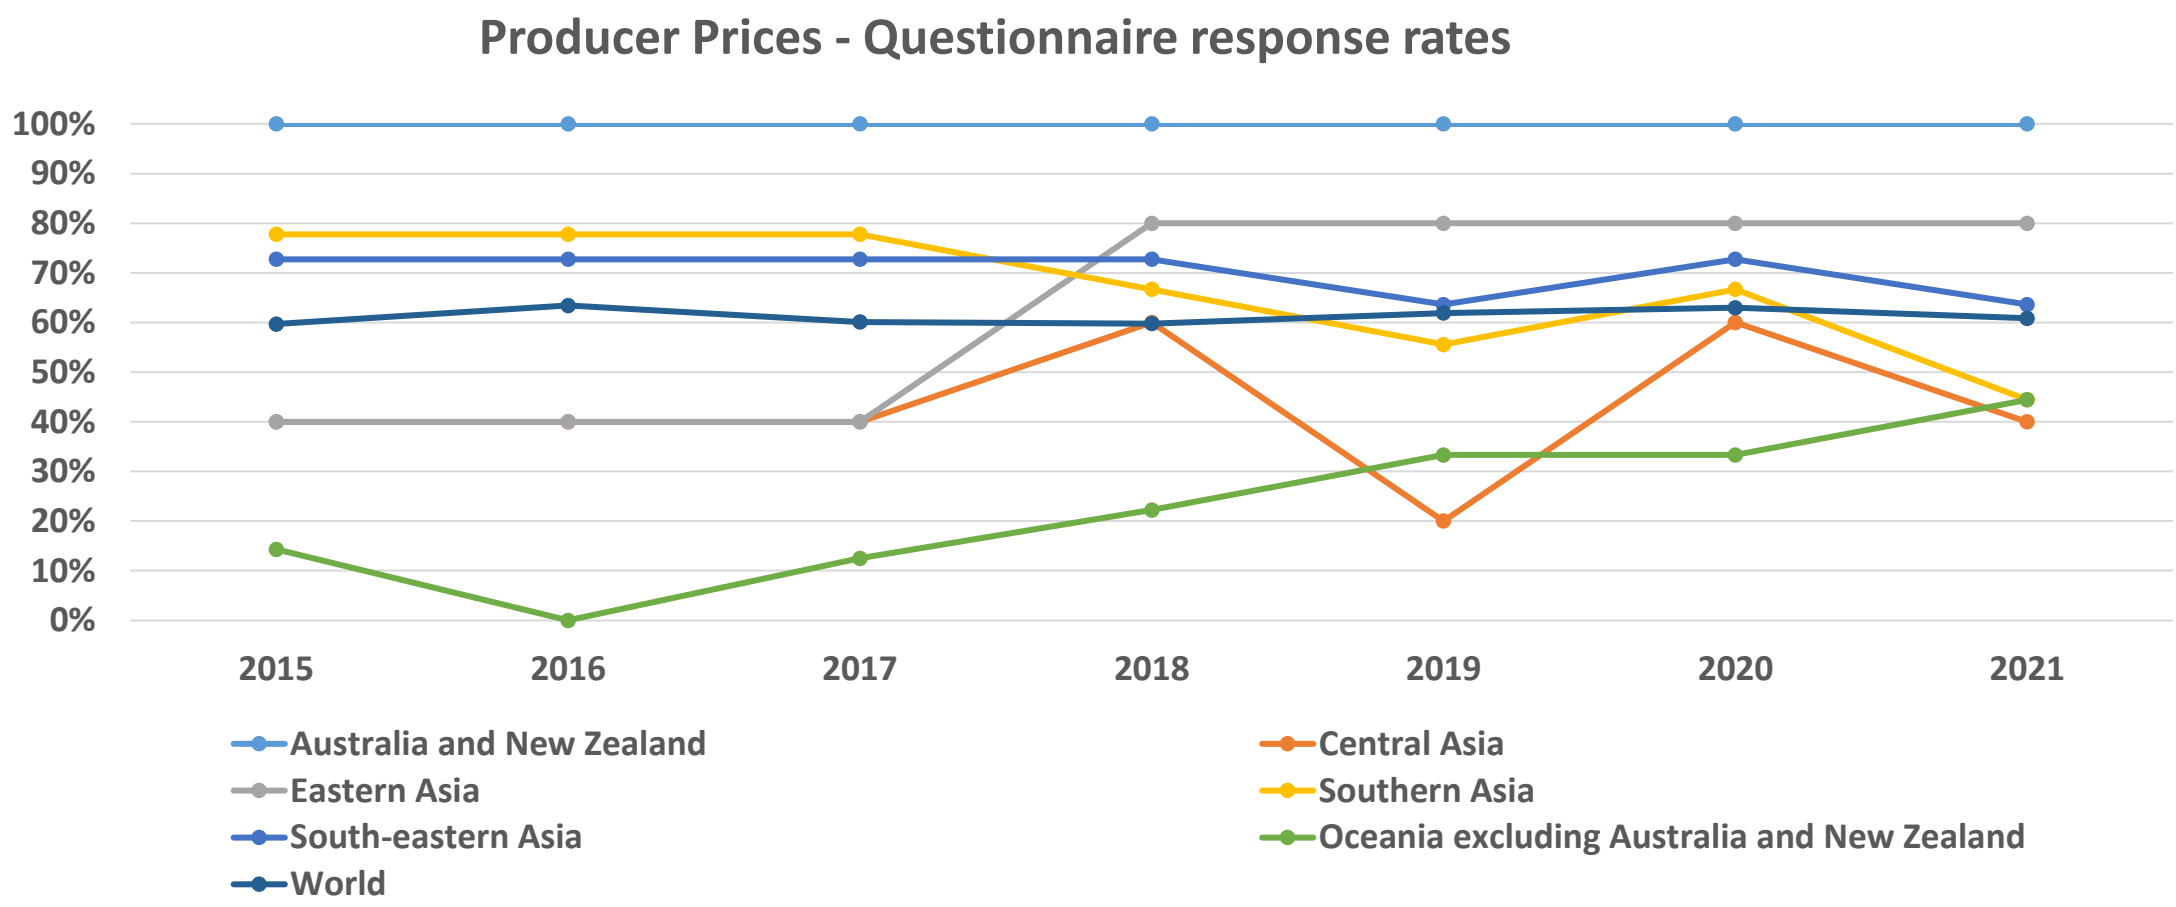

Veronica Boero  
Leader Social and Economic Statistics Team  
Statistics Division

Valerie Bizier  
Senior Statistician  
Office of the Chief Statistician

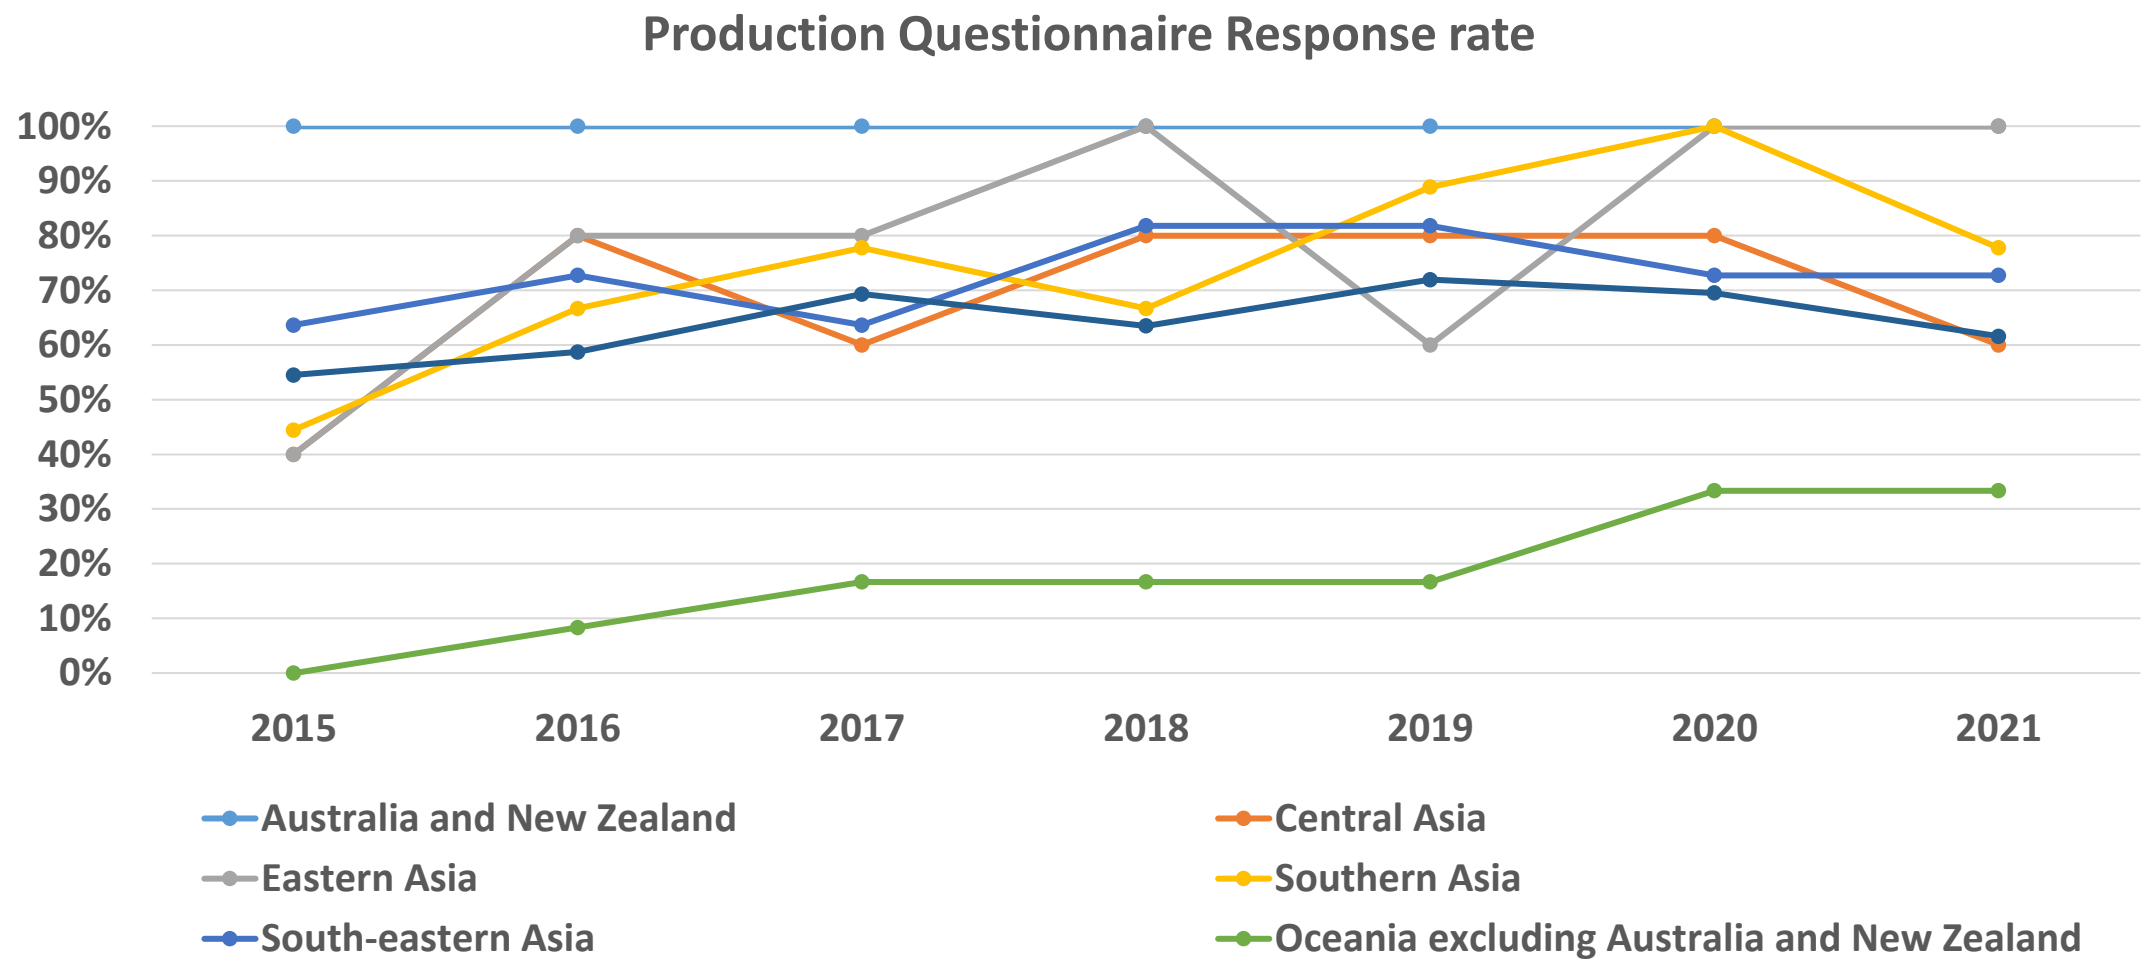

## Introduction

- The presentation reports levels and trends in response rates to questionnaires administered by FAO to National counterparts on various topics
- Objective:
  - take stock of the extent of the response to FAO's data requests, formulated through questionnaires
  - promote a discussion on how to improve the transmission of data from member countries to FAO

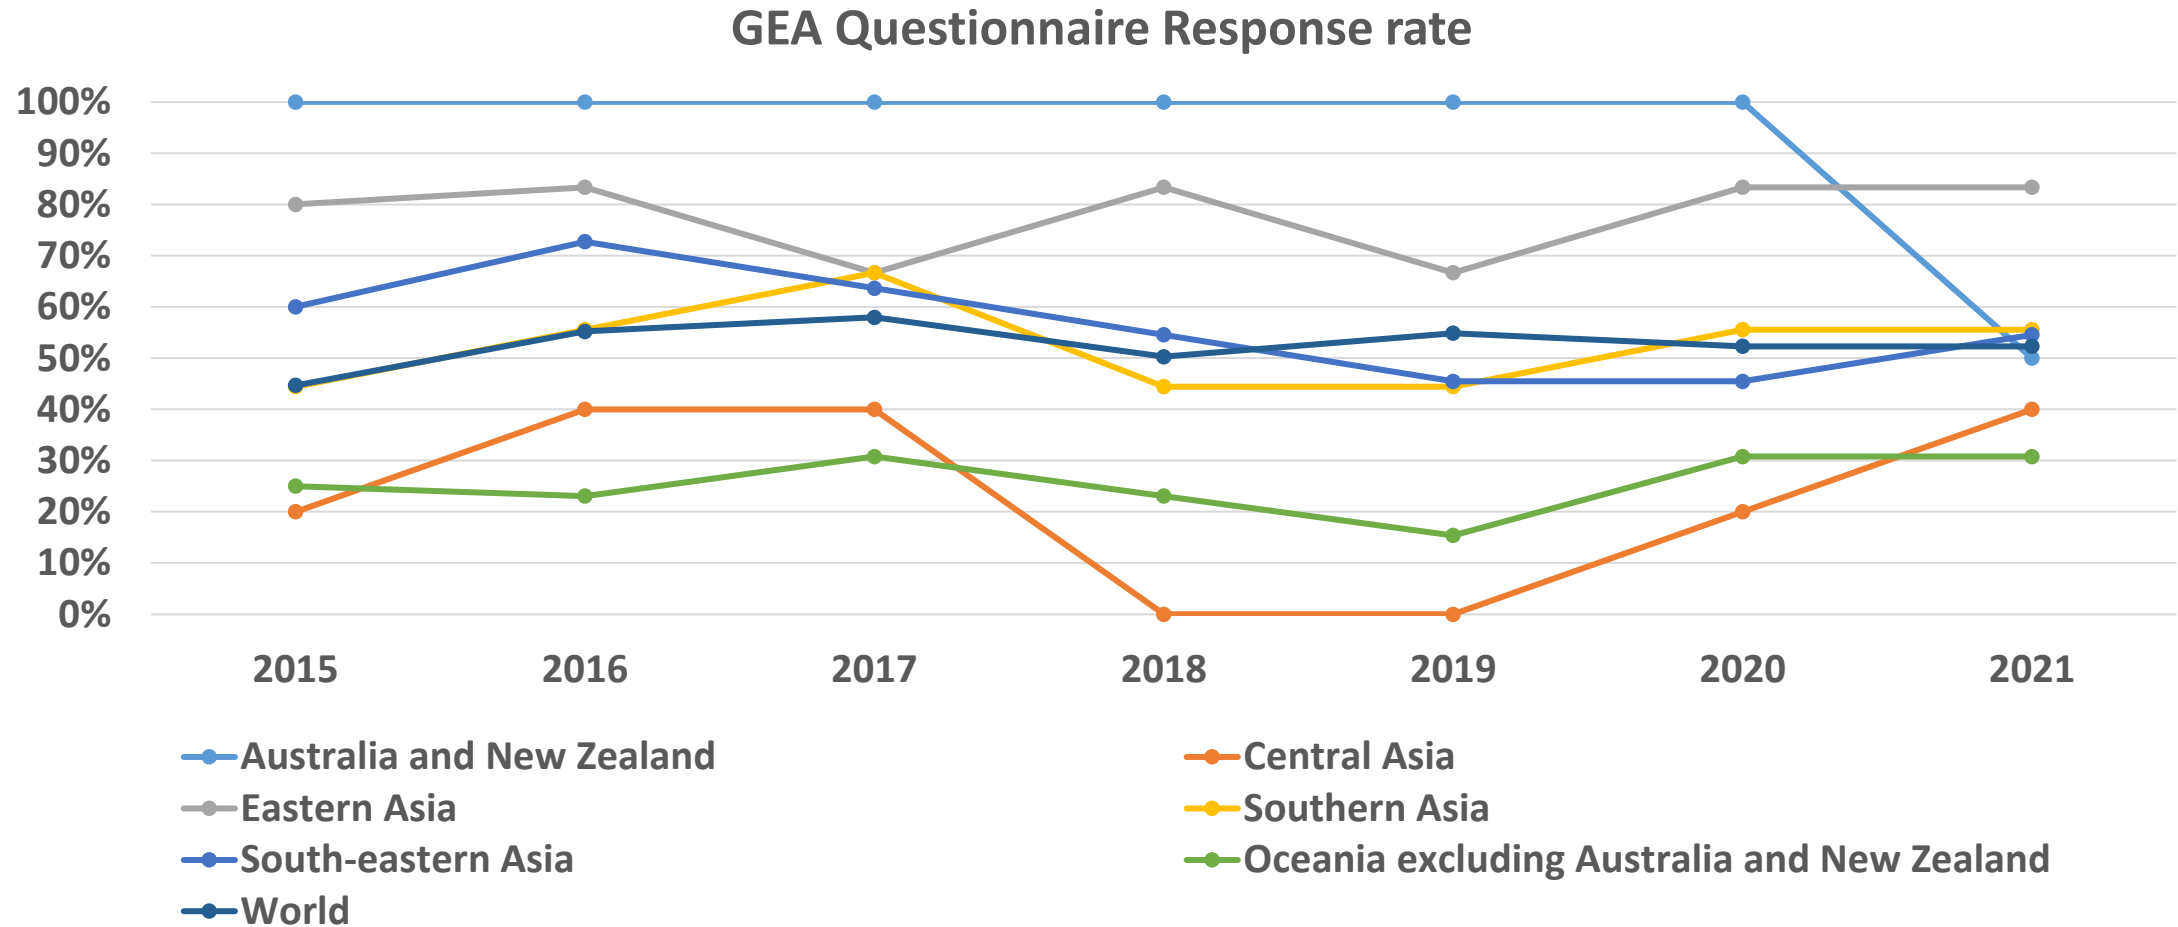

# Response rate on Producer Prices questionnaires

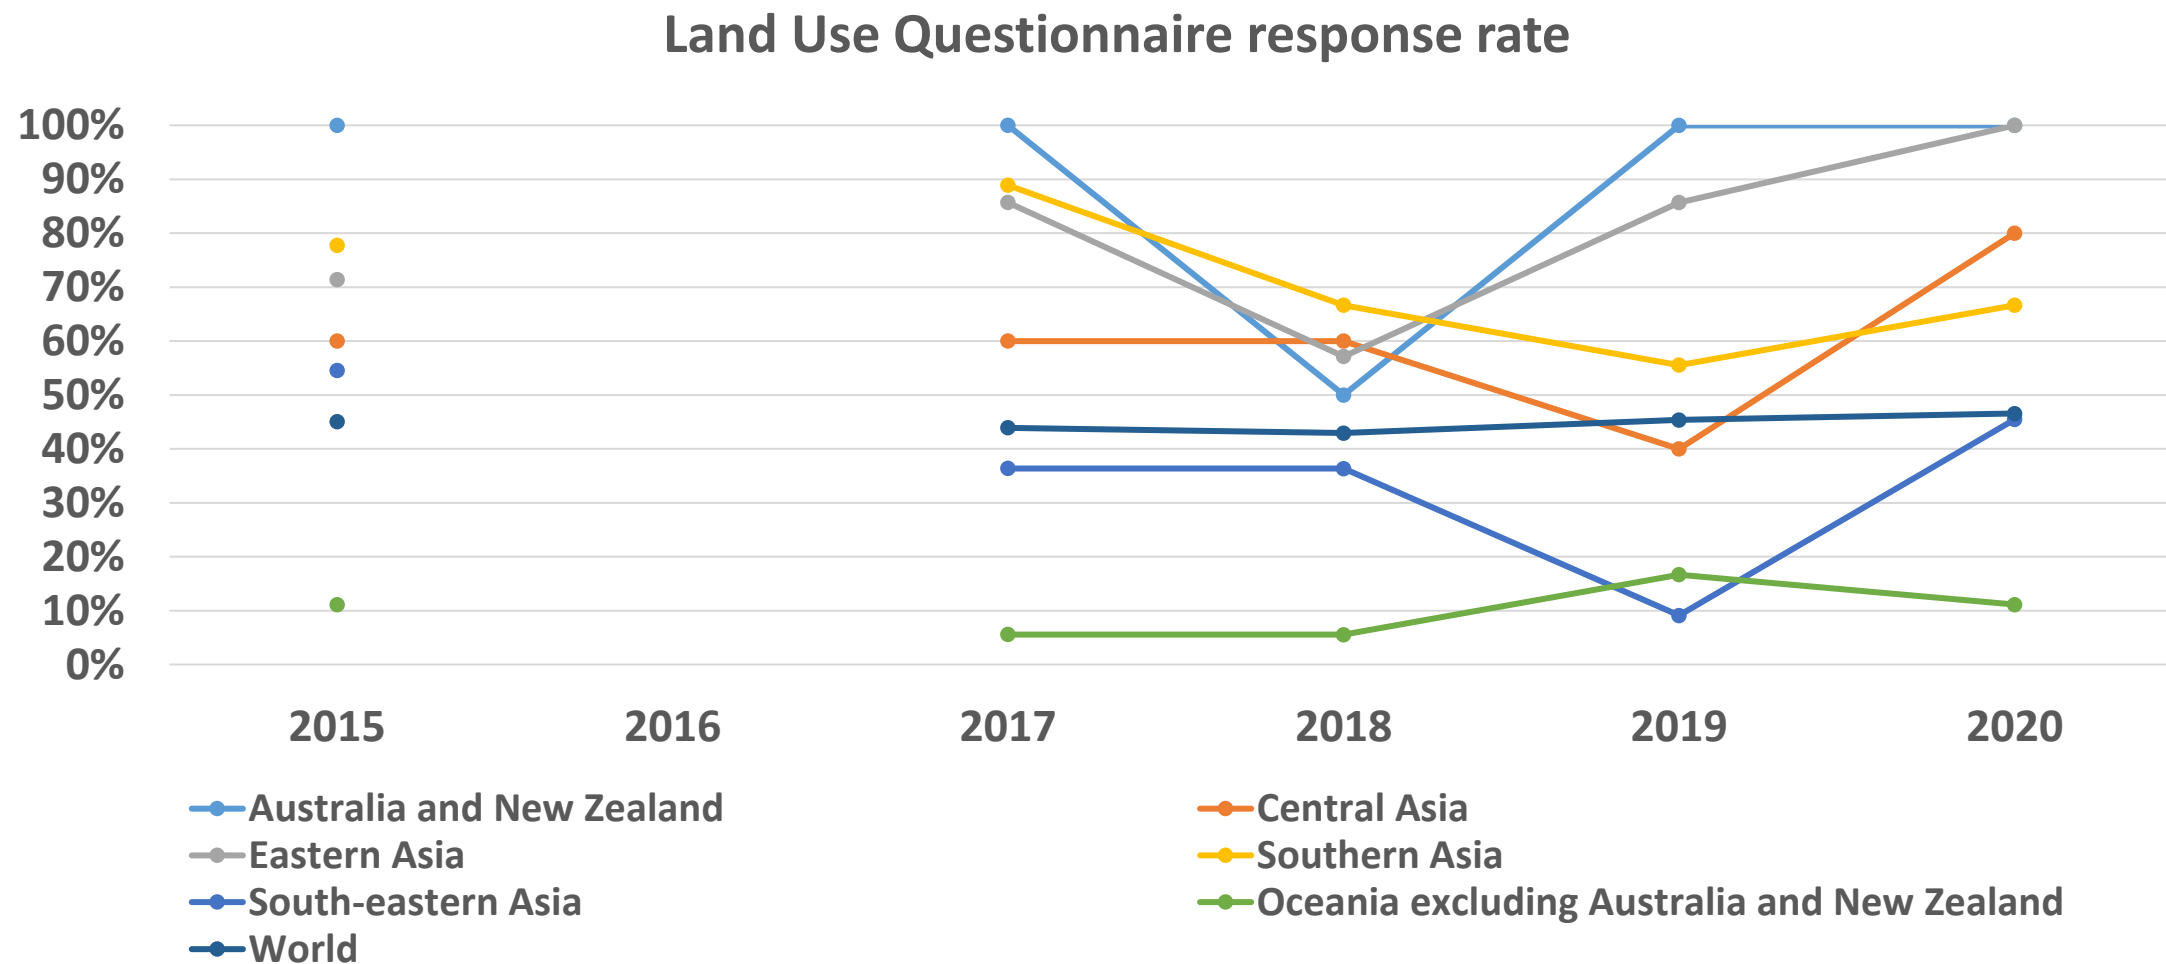

# Response rate on Production questionnaires

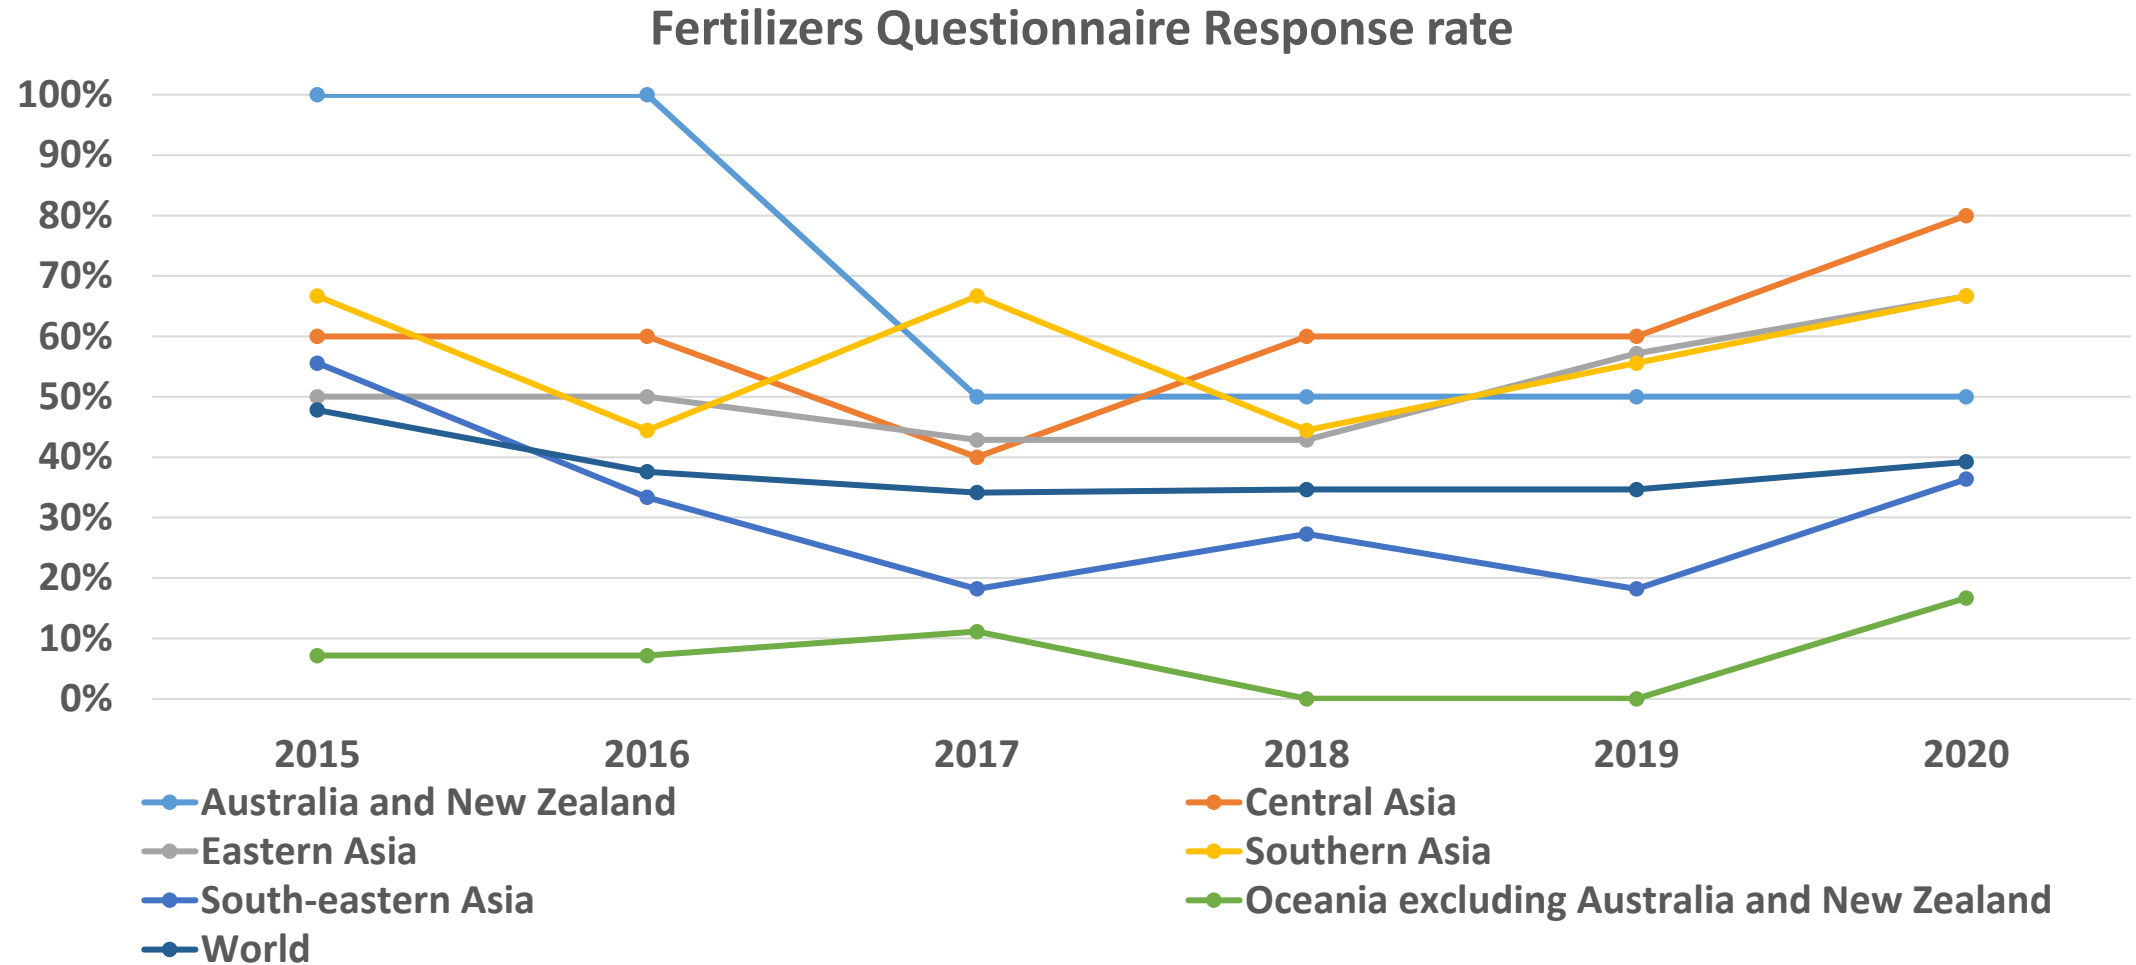

# Response rate on the Government Expenditure in Agriculture (GEA) questionnaire

# Response rate on Land Use questionnaire

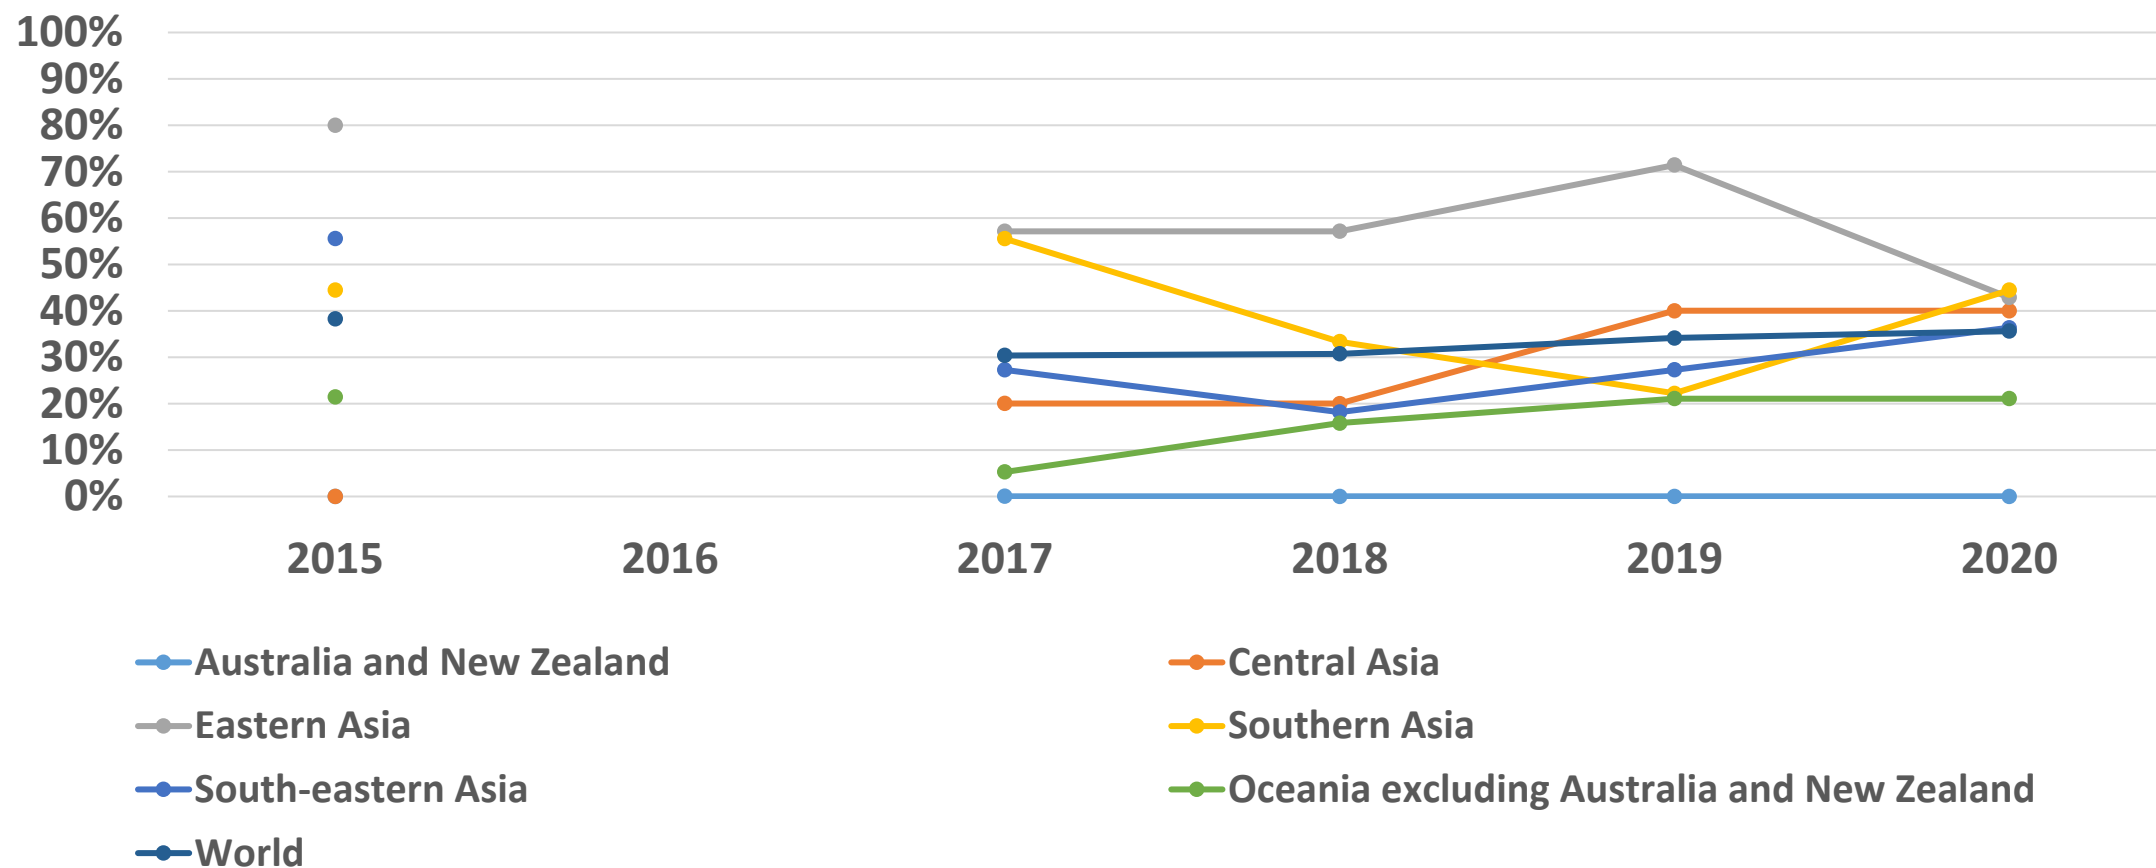

# Response rate on Fertilizers questionnaire

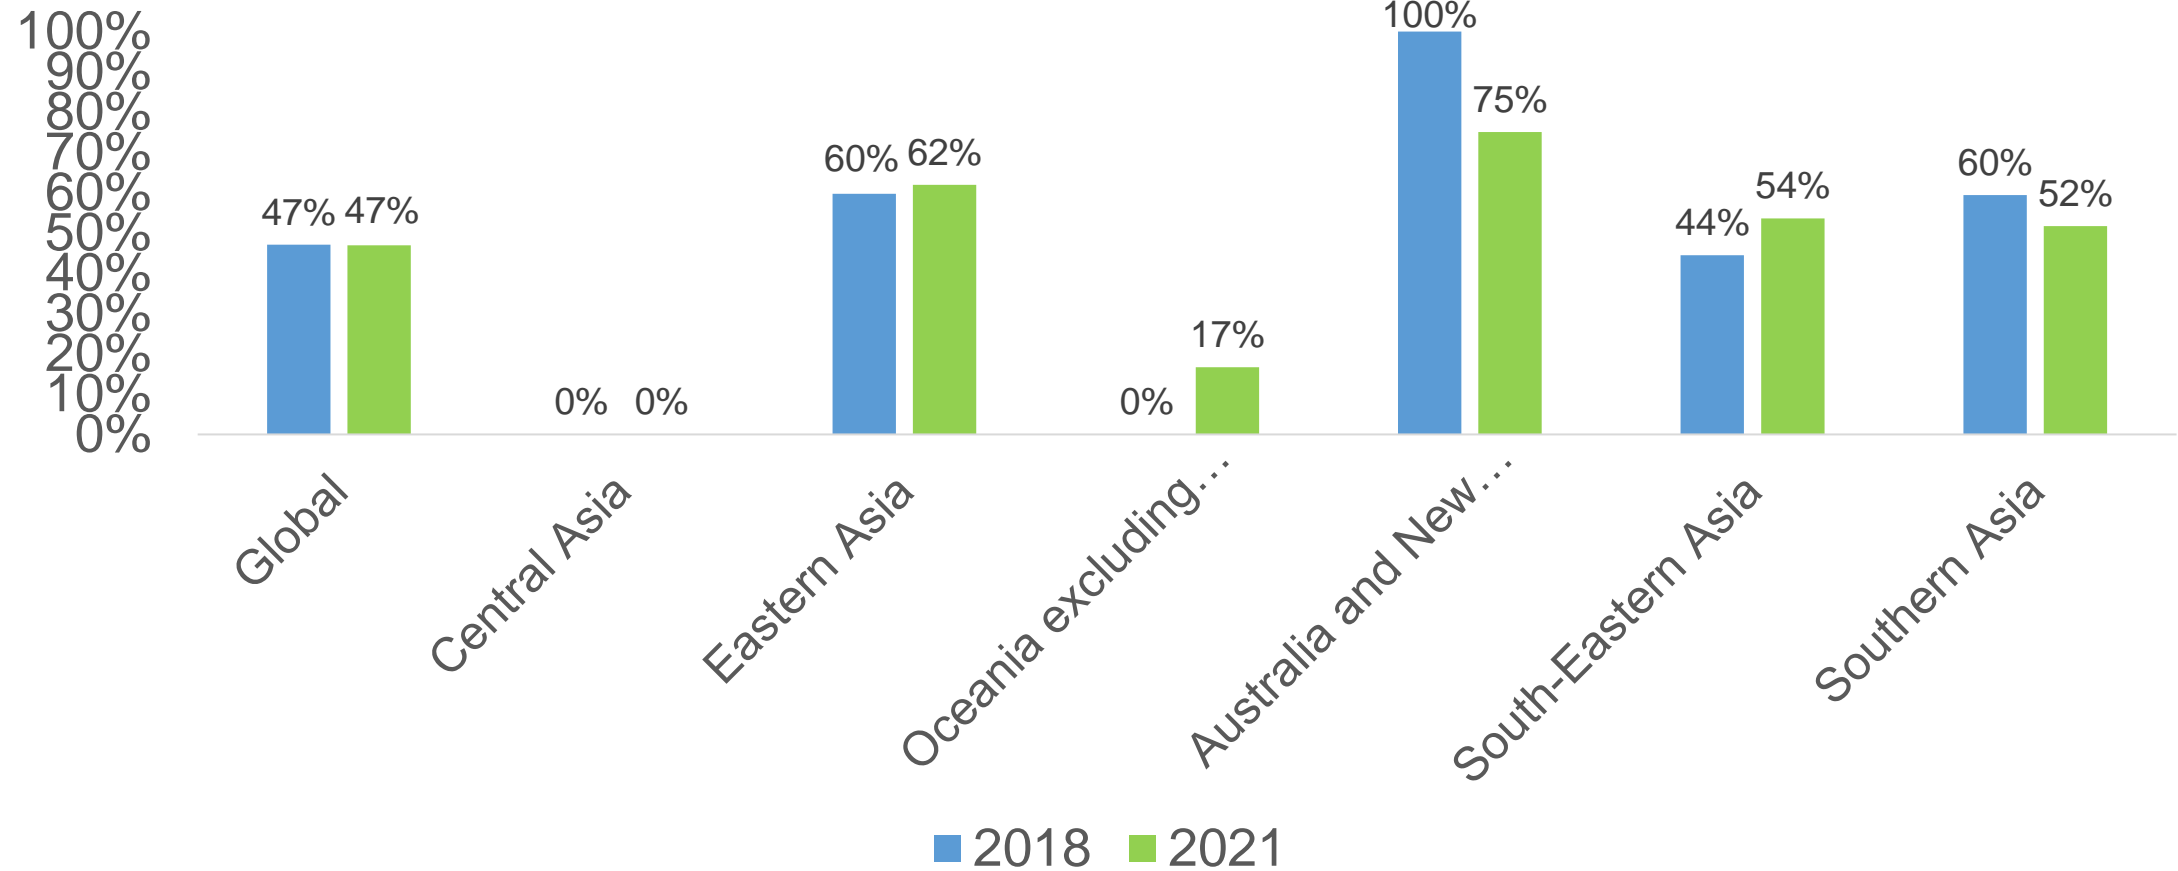

# Response rate on Pesticides Use questionnaire

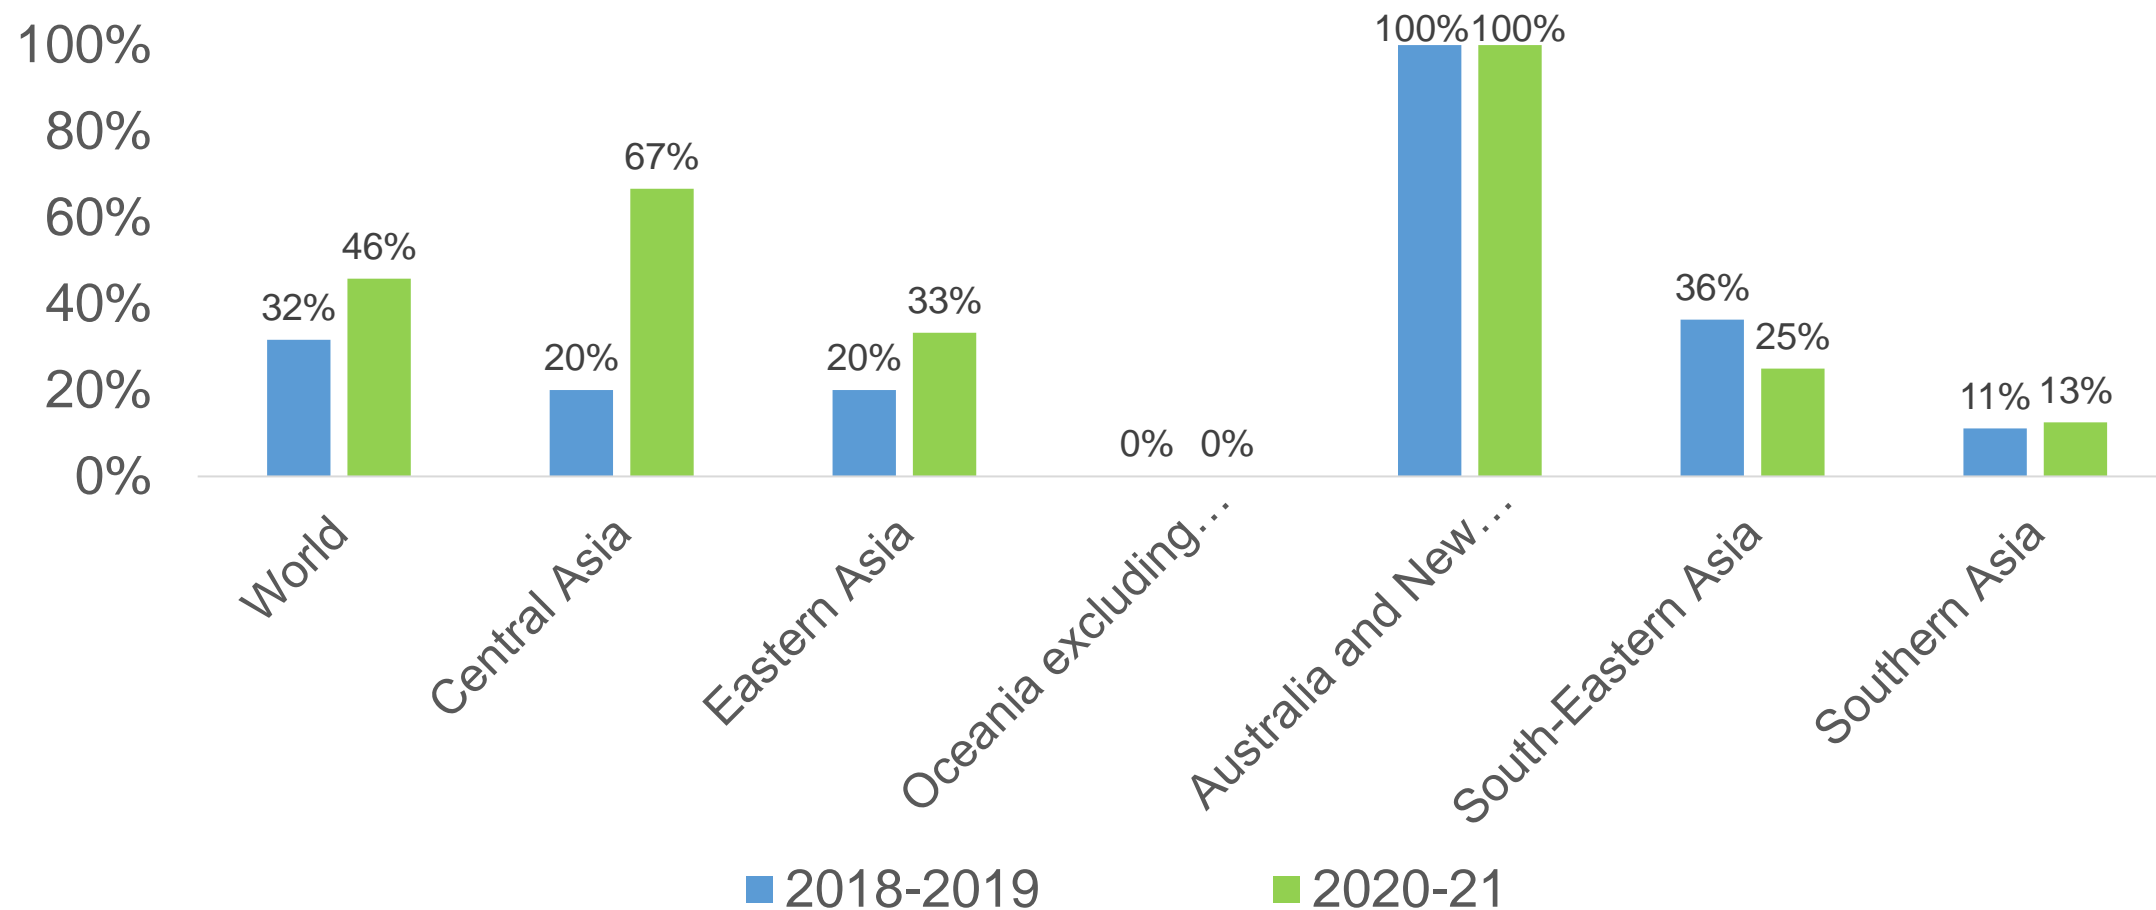

## Pesticides Use Questionnaire Response rate

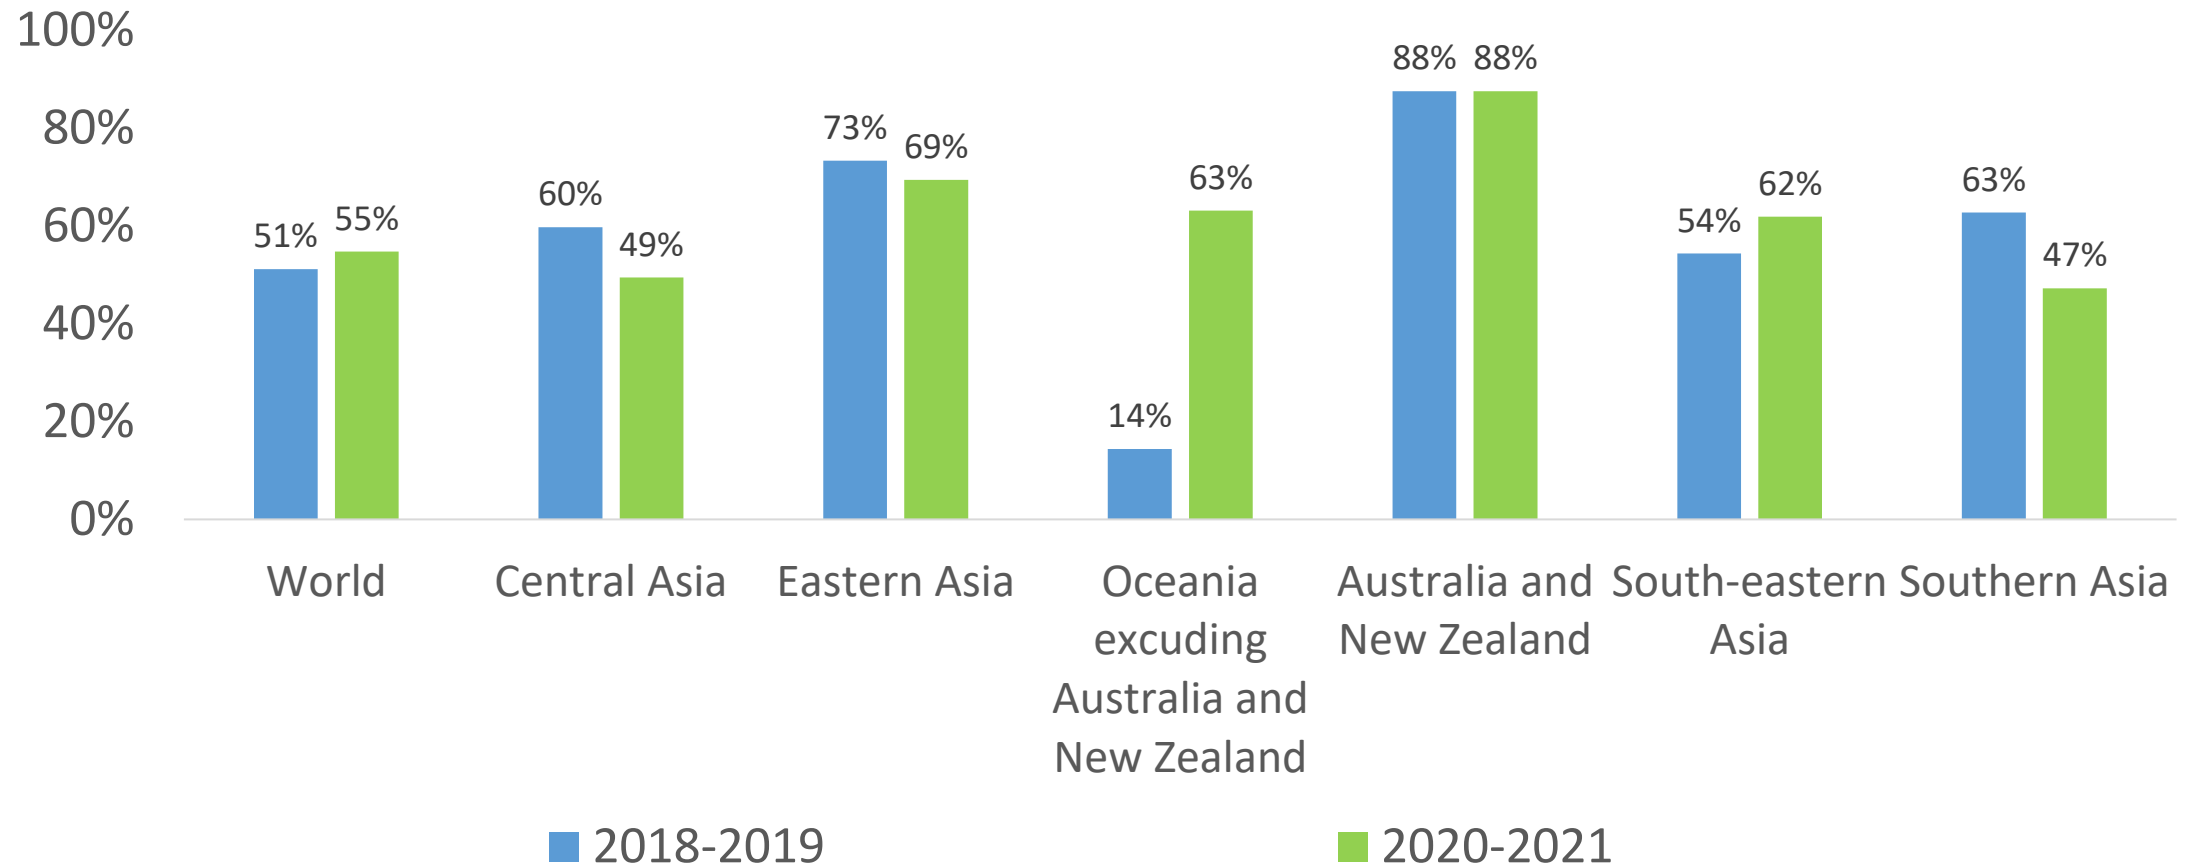

# Response rate on Commodity based questionnaires

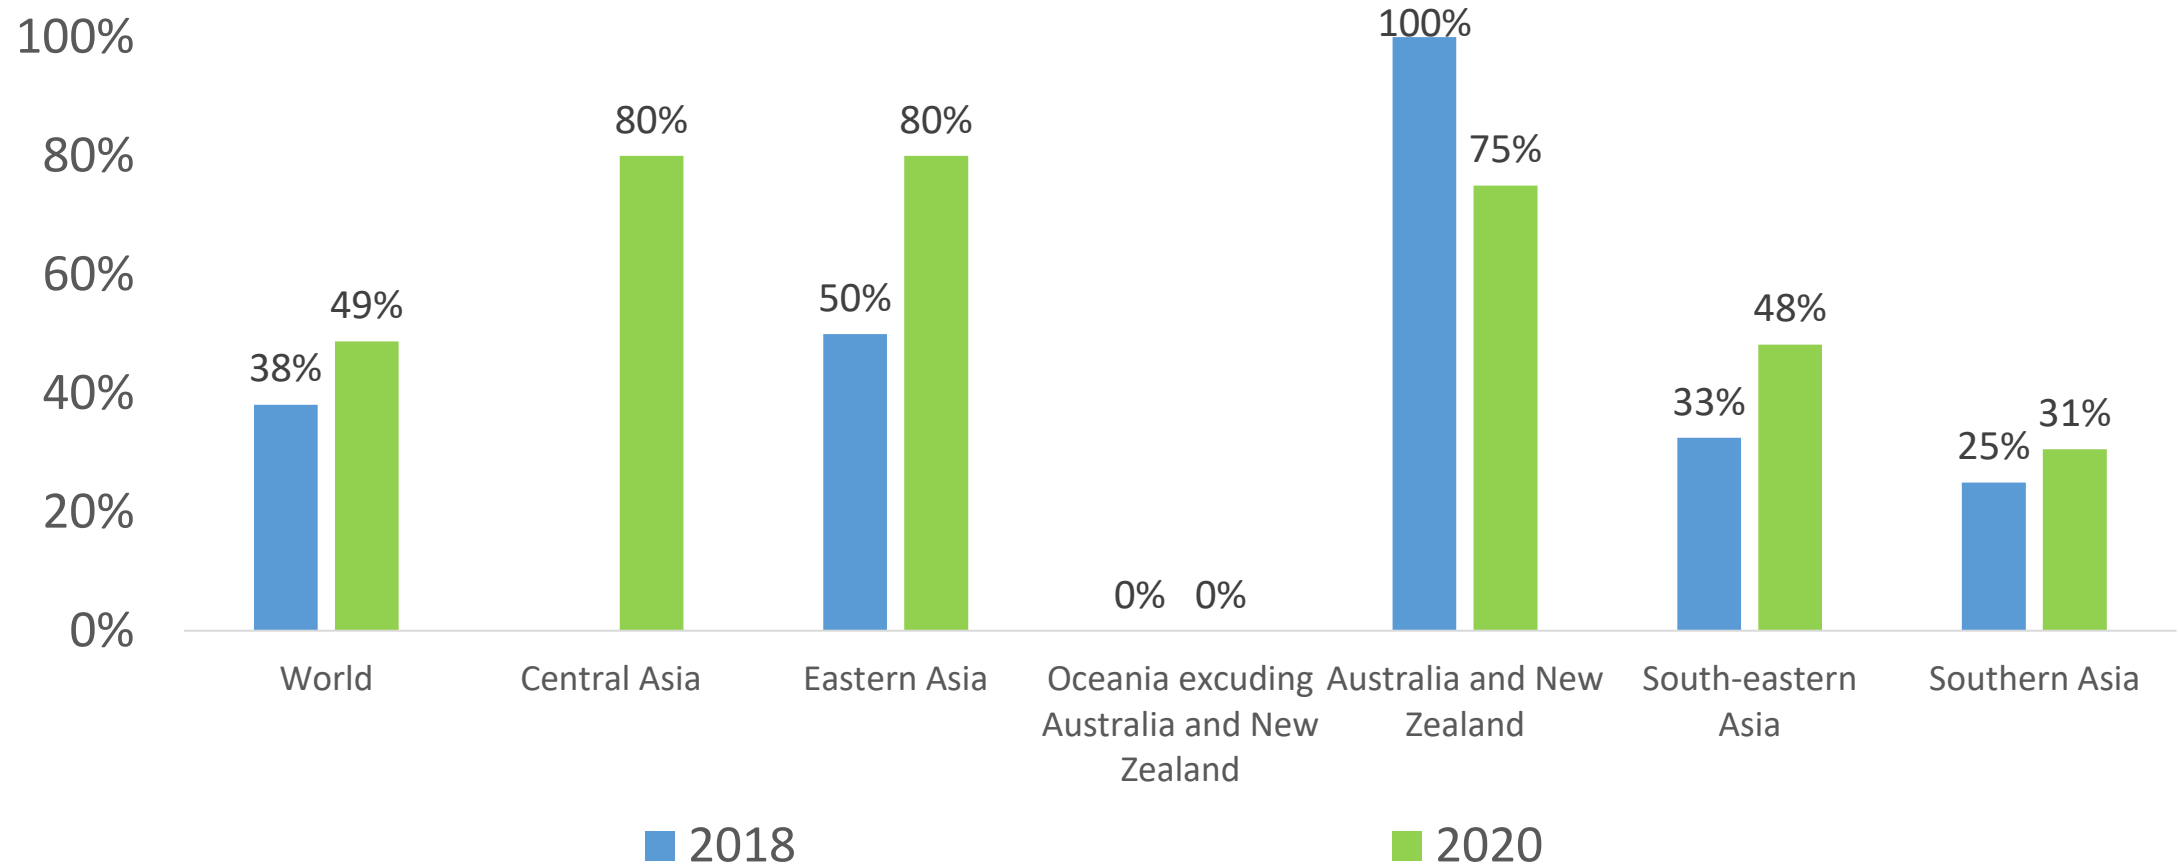

# Response rate on AQUASTAT questionnaire

# Response rate on Fishery questionnaires

# Response rate on Forestry Questionnaires

## Conclusion and way forward

- Despite notable exceptions and improvements, some sub-regions do not reach 40 percent response rate
- Distinguished delegates are invited to discuss with National counterparts and identify the reasons for lack/low/slow response
- FAO stands ready to facilitate improved and more timely transmission of information, through its regional, sub-regional and national offices.

**Thank you!**
